WE ARE EXPERTS IN THE ART OF LIVING.
Our philosophy is to empower our patients and families by providing the medical and social support necessary to embrace life. We focus on the practical side of living. Our job is to assist our patients and families through the physical, emotional, and spiritual challenges of their health needs.

TRANSITIONS HOME MEDICAL GROUP
COMMANDMENTS
All of our team members pledge to fulfill the Transitions Home Medical Group Commandments. These three fundamental principles help to ensure each patient and family receives the focused and individualized care they deserve.

1. COMMIT TO CARING™
By committing to caring, each team member pledges to dedicate themselves to their patients and the uncompromising demands of complex medical care. Our staff is always available. We will tend to our patients as often as needed regardless of their location.

2. EACH PATIENT IS UNIQUE™
Transitions believes care should never be “one size fits all”. Understanding that all of our patients have their own personal needs enables us to develop a customized plan of care that respects their specific wishes.

3. ALWAYS DO THE RIGHT THING™
Doing the right thing and doing the easiest thing are rarely the same. When it comes to complex medical care, team members are committed to continually dedicate the time and energy necessary to always do the right thing.
Our philosophy is to empower our patients and families by providing the medical and social support necessary to embrace life. We focus on the practical side of living. Our job is to assist our patients and families through the physical, emotional, and spiritual challenges of their health needs.

**PHYSICIAN SERVICES**
Primary care physician services are provided in your residence, long-term care facilities, or assisted living for acute and chronic illnesses to avoid unnecessary hospitalization. In-home visits are provided to individuals unable to leave their home due to health concerns, costs or transportation. We will assess and treat the patient’s medical needs and provide education. Individual care plans and regular follow-ups ensure each patient’s unique needs are met.

**PALLIATIVE CARE**
Patient and family centered care that optimizes quality of life by anticipating, preventing and treating suffering. Physicians, Nurse Practitioners and Licensed Clinical Social Workers will collaborate with the patients’ primary care physician to alleviate symptoms that accompany serious and chronic illnesses. Symptoms are consistently monitored and medications are adjusted accordingly. Our team is available to provide palliative care in healthcare facilities, assisted living facilities and at the patients’ residence reducing unnecessary trips to the hospital.

**WHEN TO CALL**
Physician services and palliative care are often covered by Medicare, Medicaid and private insurance. If the patient is experiencing any of the following they may qualify for in-home medical care.

- Change in healthcare conditions including:
  - Recent Hospitalizations
  - Diagnosed with a new illness
  - Mental status
  - Multiple Illnesses
  - Post Surgical Rehabilitation
  - Shortness of breath
  - Pain
  - Insomnia
  - Fatigue

- Common disease processes that may need managing:
  - CHF
  - COPD
  - Cancer
  - Dementia
  - Kidney Disease
  - Liver Disease
  - ALS
  - Depression
